It finds the rates of child poverty for each measures are similar at 30%, 33% and 27% respectively. It also finds, from a new analysis of intra-household distribution, that child deprivation would be much higher if parents were not sacrificing their own living standards for the sake of their children.

Child poverty and social exclusion | Poverty and Social ...

In the case of single-person households with dependent children, 42.8 % were at risk of poverty or social exclusion, compared with 15.6 % of households with two adults and one dependent child. More generally, the AROPE rate for a single person with dependent children was 20.9 pp higher than for households with dependent children (42.8 % vs 21.9 %).

Children at risk of poverty or social exclusion ...

Childhood poverty has moved from the periphery to the centre of the policy agenda following New Labour's pledge to end it within twenty years. However, whether the needs and concerns of poor children themselves are being addressed is open to question. The findings raise critical issues for both policy and practice - in particular the finding that children are at great risk of experiencing ...
