Forensic Facial Reconstruction: The Journey to Connect ...

In facial reconstruction, a sculptor, such as Amy Danning pictured at left, familiar with facial anatomy works with a forensic anthropologist, to interpret skeletal features that reveal the subject's age, sex, and ancestry, and anatomical features like facial asymmetry, evidence of injuries (like a

broken nose), or loss of teeth before death.

Forensic Facial Reconstruction | Smithsonian National ...

Forensic facial reconstruction is the process of recreating the face of an individual from their skeletal remains through an amalgamation of artistry, anthropology, osteology, and anatomy. It is easily the most subjective—as well as one of the most controversial—techniques in the field of forensic anthropology. Despite this controversy, facial reconstruction has proved successful frequently enough that research and methodological developments continue to be advanced. In addition to ...

Forensic facial reconstruction - Wikipedia

Forensic facial reconstruction is a rapid, non-invasive and efficient method where reconstruction can be repeated at any time if required. This technique is not only used for identification of individuals from skeletal remains but is also used for archaeological research purposes.
